SHAH SAUD

Senior Android Engineer | Kotlin · Jetpack Compose · Mobile Architecture

Islamabad, Pakistan | +92 340 9022243
shah.saud.5872@gmail.com | linkedin.com/in/shaahsaud

PROFESSIONAL SUMMARY

Senior Android Engineer experienced in designing, building and shipping production-grade Android applications using Kotlin and Java. Strong background in modern Android development, application architecture and asynchronous programming, across the full mobile development lifecycle. Comfortable contributing to technical decisions, mentoring developers, improving existing codebases and delivering reliable, maintainable mobile products. Uses AI-assisted development tools to improve implementation, debugging, testing and code review.

TECHNICAL SKILLS

Languages	Kotlin, Java
Android	Android SDK, Jetpack Compose, Jetpack (ViewModel, LiveData, Navigation, Room), Lifecycle Components, Material Design
Async & API	Kotlin Coroutines, Flow, RxJava, Retrofit, REST APIs
Architecture	MVVM, Clean Architecture, Repository Pattern, Dependency Injection, Modular Design
Data & Cloud	SQLite, Firebase Auth, Firestore, Realtime Database, FCM, Google Play Services
Engineering	Git, Gradle, CI/CD, Unit & Integration Testing, Debugging, Code Review, Performance Tuning, ANR Reduction
Specialized	WebRTC, Bluetooth, IPP / AirPrint Wireless Printing, On-device OCR
AI-Assisted Dev	AI coding agents for feature development, refactoring, debugging, test generation and code review

PROFESSIONAL EXPERIENCE

Senior Android Developer — Jan 2024 – Oct 2026

JanBark Technologies *| Mobile product studio delivering B2B and consumer Android apps*

- Owned end-to-end development of production Android apps on Google Play, including Smart Printer, which surpassed 1M+ installs. installs.
- Defined and enforced MVVM + Clean Architecture standards across the team, speeding up onboarding and sprint delivery.
- Built complex features including IPP/AirPrint wireless printing, on-device OCR, AI-powered image generation and real-time Bluetooth device discovery.
- Eliminated ANRs in critical flows by moving execution paths to Kotlin Coroutines with lifecycle-aware components and optimized background threading.
- Contributed to technical decisions, code reviews and mentoring, and safeguarded production release quality.

Android Developer — May 2023 – Dec 2023

Ninesol Technologies *| Software house delivering Android products across client domains*

- Architected and launched a WebRTC-based screen-mirroring SDK from scratch, achieving sub-100 ms latency for real-time streaming.
- Led and mentored a team of 2–4 developers and strengthened code-review practices, reducing QA-reported bugs by 40%.
- Introduced systematic crash tracking and error-handling patterns, improving stability across client applications.

Android Developer — May 2022 – Apr 2023

ISYSTECH IT Solutions Pvt Ltd *| IT services company building custom Android apps for enterprise clients*

- Designed and developed enterprise Android applications with REST API integration and RxJava, with a focus on performance, robustness and edge-case handling.
- Wrote tests, resolved critical production bugs and optimized UI rendering for smoother performance.

Junior Android Developer — Sep 2021 – Apr 2022

Center for Mobile Research, NUML *| National University of Modern Languages*

- Developed reusable Android modules and components, applying Material Design and Android lifecycle best practices.

RECENT PROJECTS

- **Smart Printer & Scanner:** Production printing and productivity app with wireless printing, IPP/AirPrint, OCR, Bluetooth and document/photo workflows (1M+ installs).
- **Screen Mirroring & Cast to TV:** Screen-mirroring and casting app with real-time communication, media casting and Smart TV connectivity, built on a custom WebRTC-based SDK.
- **DeepSearch AI Assistant:** AI-powered app for deep search, intelligent information discovery and AI-assisted answers, with API integration.
- **AI Logo Maker:** Design app with an interactive SVG editor, creative tools, asset manipulation and custom UI components.
- **Other recent apps:** AI Wallpaper Generator, AI Background Remover, AI Interior Design, Plant Identifier, Hidden Camera Detector, Data Recovery, Cloud Storage, Sleep Tracker, Screen Recorder and more.

EDUCATION & CERTIFICATIONS

Bachelor of Software Engineering – Grade A | NUML, Islamabad — **Aug 2018 – Jun 2022**

Certifications: Artificial Intelligence Developer, PIAIC (2023) · Data Science & ML Training, CyberVision International (2021)
